XT-90

EXTRUDED ALUMINIUM

Single-skin straight slat in extruded aluminium.
 A highly versatile door model, ideal for replacing doors made of sheet metal or similar without the need for building work. Indicated for ground floor commercial premises.

PORTALUM

TECHNICAL CHARACTERISTICS

Extruded aluminium

Area Coverage total closed	100 mm
Approximate weight m2	9 kg
Maximum width recommended	4500 mm
High recommended maximum	4000 mm
Options roller doors	Solid and Mixed, Perforated with and without methacrylate Microperforated
Perforated measurement	200 x 59 mm / 430 x 59 mm

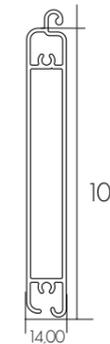

options roller doors

XT-91

EXTRUDED ALUMINIUM

Double-skin straight slat in extruded aluminium. A highly versatile door model, ideal for replacing doors made of sheet metal or similar without the need for building work. Indicated for ground floor commercial premises.

TECHNICAL CHARACTERISTICS

Extruded aluminium

Area Coverage total closed	100 mm
Approximate weight m2	9 kg
Maximum width recommended	4500 mm
High recommended maximum	4000 mm
Compatibility for combining	XT-90

options roller doors

Compatibility for combining with the XT-90 model.
options roller doors

XT-79

EXTRUDED ALUMINIUM

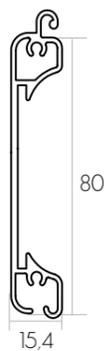

Single-skin straight slat in extruded aluminium. A sturdy, pleasantly-looking and easy-rolling door that makes it the best option for single-family residences, garages and commercial premises.

TECHNICAL CHARACTERISTICS

Extruded aluminium

Area Coverage total closed	80 mm
Approximate weight m2	11,5 kg
Maximum width recommended	5500 mm
High recommended maximum	4500 mm
Options roller doors	Solid and Mixed, Perforated with and without methacrylte
	Microperforated
Perforated measurement	100 x 38 mm

options roller doors

XT-80

EXTRUDED ALUMINIUM

Double-skin straight slat in extruded aluminium, which can be installed facing inwards or outwards without losing aesthetics or performance.

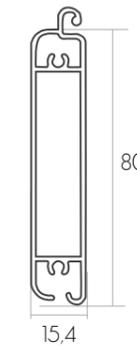

Its straight style and its firmness make this door suitable for large widths such as garages for single-family residences, business doors, etc. It is a sturdy door, perfect for maintaining a high degree of security.

TECHNICAL CHARACTERISTICS

Extruded aluminium

Area Coverage total closed	80 mm
Approximate weight m ²	12,5 kg
Maximum width recommended	5000 mm
High recommended maximum	4500 mm
Compatibility for combining	XT-79

options roller doors

Compatibility for combining with the XT-79 model.

options roller doors

[XT-10]

EXTRUDED ALUMINIUM

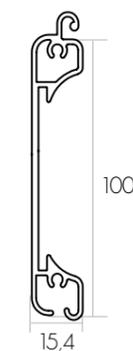

Single-skin straight slat in extruded aluminium. This door model is very versatile, since with the same profile we have three doors of different directions and uses. Indicated for those seeking elegant aesthetics.

SOLID: A classic door, conveying a sensation of invulnerability and security.

DIE-CUT: For businesses looking to display the shop window, without affecting the security of their product.

MICRO-PERFORATED: Offers great visibility of the interior of the premises when it is lit at night, while making it impossible for anyone from the outside to throw anything into the premises.

XT-10

TECHNICAL CHARACTERISTICS

Extruded aluminium

Area Coverage total closed	100 mm
Approximate weight m2	10 kg
Maximum width recommended	5500 mm
High recommended maximum	4500 mm
Options roller doors	Solid and Mixed, Perforated with and without methacrylate
	Microperforated
Perforated measurement	200 x 59 mm / 430 x 59 mm

options roller doors

[LM-78]

LAMINATED ALUMINIUM

Curved slats in laminated aluminium filled inside with polyurethane foam.

The polyurethane foam gives the door a thermal, acoustic and resistance insulation, which together with its curved design make this door suitable for single-family residences, community garages, etc. It is a door that is light and very silent, perfect for continuous daily raising and lowering operations.

TECHNICAL CHARACTERISTICS

Laminated aluminium

Area Coverage total closed	77 mm
Approximate weight m2	5,5 kg
Maximum width recommended	5000 mm
High recommended maximum	3500 mm
Compatibility for combining	XT-79

LAMINATED ALUMINIUM

self-locking_

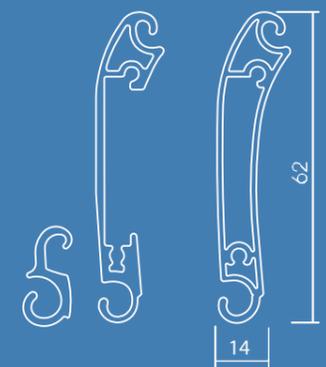

PORTALUM
PUERTAS DE ALUMINIO

XT-150

extruded aluminium high security

Double-skin, high security curved slats in extruded aluminium. The door consists of two different types of profiles: main and intermediate slats. Due to the innovative design of its profiles, when the door is lowered, the intermediate profile rotates in the guide and provides a locking point on both sides of the guide. Its slats are locked by configuring its profiles on the descent at all times, without the need for any external element or mechanism.

An ideal door for business premises, and single-family residences with large windows, where security is prioritised and valued first and foremost.

TECHNICAL CHARACTERISTICS

Extruded aluminium high security

Area Coverage total closed	62 mm
Approximate weight m ²	11.5 kg
Maximum width recommended	4500 mm
High recommended maximum	5000 mm
Options roller doors	Solid and Mixed, Perforated with and without methacrylte
Perforated measurement	160 x 27 mm y 69 x 27 mm

[XT-300]

extruded aluminium high security

Double-skin, high security curved slats in extruded aluminium.

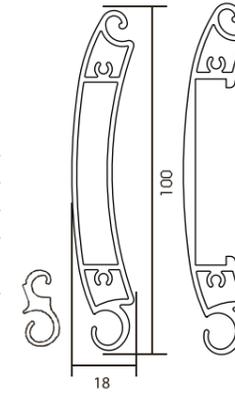

It uses a self-locking system, with a 3 metre high door once closed providing 60 locking points simultaneously. Its slats are locked by configuring its profiles on the descent at all times, without the need for any external element or mechanism.

This door is perfect for all businesses and residences where unexpected visits are not desired and where security is the main priority.

TECHNICAL CHARACTERISTICS

Extruded aluminium high security

Area Coverage total closed	100 mm
Approximate weight m2	15,5 kg
Maximum width recommended	6000 mm
High recommended maximum	7000 mm
Options roller doors	Solid and Mixed, Perforated with and without methacrylate
Perforated measurement	210 x 45 mm y 82 x 45 mm

options roller doors

high security
MARCADO CE

XT-350

extruded aluminium high security

Single-skin straight high security slats in extruded aluminium, with micro perforations that allow a great visibility into the premises when the interior is lit.

It employs the self-locking system, which provides a very high level of security.

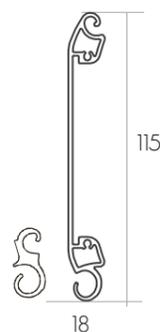

This door is perfect for businesses wishing to avoid objects being thrown inside and to aid the surveillance task.

TECHNICAL CHARACTERISTICS

Extruded aluminium high security

Area Coverage total closed	115 mm
Approximate weight m ²	11 kg
Maximum width recommended	6000 mm
High recommended maximum	5000 mm
Options roller doors	Solid and Micorperforated
